

Tait Overview

Tait Radio Communications

An established **Manufacturer** of UHF, VHF and 700/800MHz portables, mobiles and base stations for public safety agencies.

A champion of **open standards** radio technology for P25, DMR and MPT which promotes vendor competition.

A trusted **Partner** to meet your narrowbanding compliance, privacy and budget challenges through staged migrations and long-term solutions.

A skilled developer of **scalable software** for securing communications and maximizing your current network investment.

Tait Radio Communications

An **established** U.S. presence for more than 20 years with a headquarters that features a DHS-approved P25 Compliance Assessment Program laboratory.

An industry **Leader** in designing, deploying and supporting conventional, trunked and simulcast networks in challenging coverage environments.

An **innovator** of customized communications solutions that promote a safer working environment and transparent ROI to match your unique requirements.

Solutions for Public Safety

Tait Tough Radios with **Phase 2 upgrade** path, certified interoperability digital audio clarity and superb build quality for dependable communications.

Systems designed by **experienced** engineers to deliver penetrating in-building coverage in cities and expansive rural areas to enable responders to communicate with confidence in high noise environments.

Applications, data and software to deliver accurate location services, diagnostic features and communications **management**.

A **complete** network/dispatch communications solution provider that works with best-in-class partners to manage entire communications interoperability projects.

Encryption solutions using open standards for efficient management of encrypted radios and to prevent eavesdroppers listening in on **secure** conversations.

TP9100 Portable series

TM9100 series

How Police Use Tait – Case Study

State of Colorado Challenge

- Simultaneous communication on the State of Colorado DTRS and analog VHF networks

Tait Solution – Dual Body Radio

- Each radio body operates independently
- Both radios are active and any audio received from either radio will be heard
- Both radios can transmit when PPT pressed

How Fire and EMS Use Tait

- Dual Head radio keeps everyone involved in the front and back of the vehicle
- Colors help find the radio in dark places and show if blood is present
- Angled knobs allow easy operation when wearing fire gloves

Tait in Louisiana

- Dealers in various locations
- Representation at LA APCO, GOSEP, Sheriffs, State Fire conferences in 2011
- LA agencies who trust Tait:
 - Lincoln Parish Fire
 - Pafford EMS
 - East Feliciana OHS
 - Union Parish Sheriff
 - Jackson Parish Police
 - EMS East Monroe
